Preventive Care Covered at 100%

Your plan covers the preventive services listed here 100 percent as part of preventive care. This includes routine screenings and checkups. It also includes counseling you get to prevent illness, disease or other health problems. You won’t have to pay anything for these services when:

- You get them from an Emory Healthcare (EHN) or In-Network provider
- The main purpose of your visit is to get preventive care

That means no co-payment and no co-insurance. You don’t have to meet your deductible first. Many of these services are covered as part of routine physical exams. These include regular checkups, routine gynecological visits and well-child exams. You won’t have to pay out-of-pocket for these preventive visits, unless you get services not on this list at the same time. But, these services are not preventive if you get them as part of a visit to diagnose, monitor or treat an illness or injury. Then co-pays, co-insurance and deductibles apply. Let your network doctor know that Aetna covers these preventive services 100 percent when they are billed as part of your preventive care.

Covered preventive services for adults
