

UPDATES FROM TRANSPORTATION AND PARKING

University Faculty/Staff Pricing Model

Our new parking pricing structure includes daily rates with monthly/semester caps. Thus, you will only be charged for your usage.

For example, if you park twice in any given month, you will be charged \$12 (\$6 daily rate x 2 days = \$12). However, if you park ten or more times in any given month, you will be charged the monthly cap of \$56.

[Click here](#) for more information on our permit pricing structure.

Parking Registration

If you will be parking on campus during business hours (Monday-Friday, 3:00am - 4:00pm), you will need a permit. To register for a parking permit, [click here](#).

Note: You will be billed even if the parking gates are open during business hours. There is no charge to park in permit areas on university holidays and during winter break.

Surface Lots

Although surface lots are not gated, parking activity is monitored and recorded. License plates, as well as your permit, are used for verification purposes. Thus, you will be billed for usage.

Check Your Parking Usage

All parking customers will now be able to check their parking usage and transactions by [clicking here](#) and utilizing their NetID and password to log on. You must be on the Emory network to access the tool.

Note: Employees who pay for parking via payroll deduction will see the prior month's usage and respective charges on their pay advice. For example, the October pay advice will reflect the parking charges for the month of September (9/1- 9/30).
